Mobiluncus curtisii & mulieris
Mycoplasma hominis
Prevotella bivia
Ureaplasma urealyticum

NORMAL VAGINAL FLORA

Lactobacillus crispatus
Lactobacillus gasseri
Lactobacillus jensenii
Lactobacillus iners

AEROBIC VAGINITIS

Enterococcus faecalis
Escherichia coli
Staphylococcus aureus
Streptococcus agalactiae

CANDIDIASIS

Candida albicans
Candida glabrata
Candida krusei
Candida lusitanae
Candida parapsilosis
Candida tropicalis

STI

Chlamydia trachomatis
Mycoplasma genitalium
Mycoplasma hominis
Neisseria gonorrhoeae
Ureaplasma urealyticum
Trichomonas vaginalis

GENITAL ULCER

Haemophilus ducreyi
HHV (Herpes Simplex 1 & 2)
Treponema pallidum

BACTERIAL VAGINOSIS PANELS

- Panel detects the presence of normal vaginal flora
- Panel detects pathogenic species causing bacterial vaginosis and vaginitis
- Results provided through our secure provider portal or fax

NOW YOU CAN PROVIDE PATIENTS THE QUICKEST AND MOST ACCURATE DIAGNOSIS POSSIBLE

- Reports within 24 hours after the lab receives the specimen
- Identifies pathogens which are difficult to culture
- Identifies bacteria after recent antibiotic use
- Yields greater than 95% analytical sensitivity and specificity
- Simplicity of single sample collection
- Personal customer service experience

AS A HIGH-COMPLEXITY CLIA ACCREDITED LABORATORY, ORCHARD LABORATORIES SUPPORTS CLINICIANS AND OTHER HEALTH CARE PROVIDERS TO QUICKLY IDENTIFY THE PATHOGENS AND OTHER UNDERLYING CAUSES OF DISEASE.

WE REALIZE BETTER PATIENT OUTCOMES ARE REACHED THROUGH RAPID, ACCURATE, AND DEPENDABLE LABORATORY RESULTS.
